Software Engineer

Software Engineering student (CGPA 3.75, 10x Dean's List) with proven full-stack and automation experience delivering enterprise software at Chin Hin Group Property. Architected an end-to-end Python/Flask and Microsoft Graph reporting pipeline deployed across 15+ construction projects. Skilled in the PERN stack (PostgreSQL, Express, React, Node.js), REST API design, relational database modeling, and SaaS integrations.

WORK EXPERIENCE

Chin Hin Group Property

05/2026 - 08/2026

IT Intern • Internship

Kuala Lumpur, Malaysia

- Architected an automated QESH inspection reporting engine using Flask, SQLite, and Microsoft Graph API, actively synchronizing real-time Novade Cloud data across 15+ construction projects.
- Developed automated PowerPoint presentation generation and HTML email dispatch pipelines featuring dynamic scoreboards and photo severity tagging.
- Engineered background scheduling services to automate SharePoint folder provisioning, shareable link distribution, and automated 14-day PIC overdue reminder workflows.
- Built 3 production Power Apps (asset inventory management, QA workflows, site progress logging) and executed a 57-site SharePoint migration via PnP.PowerShell.
- Configured Zendesk workflows, executed purchaser data migrations from MytePro, and coordinated vendor UAT defect tracking recognized by senior management.

EDUCATION

Bachelor's in Information Technology - Software Engineering

UNITAR International University • GPA: 3.75

Malaysia • 09/2023 - Expected 11/2026

- Dean's List for 10 consecutive semesters from Foundation - Bachelor's 7th Semester
- Relevant Coursework: Object-Oriented Programming, Software Testing & QA, Database Systems, Project Management, Agile Scrum, PERN Full-Stack Development

AWARDS & SCHOLARSHIPS

Final Year Project Best Presenter Awards

04/2026

UNITAR International University

System Analysis & Design Best Idea Pitching

09/2024

UNITAR International University

PROJECTS

Mr. Tasky – Service Marketplace Platform

09/2025 - 04/2026

UNITAR International University

- Architected a full-stack PERN platform connecting consumers with service providers using multi-role authentication (RBAC).
- Designed a normalized PostgreSQL schema with indexed queries and integrated OpenStreetMap API for location-based search.
- Implemented secure RESTful endpoints for authentication, profile updates, and booking transactions using Express.js and React.

GMC Multimedia Computer

02/2026 - 02/2026

GMC Multimedia Computer

- Developed and deployed a fully responsive corporate website integrated with continuous deployment via Git and Netlify.

- Optimized page load speeds, SEO metadata, and asset delivery, ensuring cross-browser compatibility and accessible UI design.
- Collaborated directly with business stakeholders to gather technical requirements and deliver production-ready client features.

Book4U – Event Management Platform

01/2025 - 04/2025

UNITAR International University

- Built a full-stack event platform using PHP and MySQL, integrating Stripe API (sandbox) for secure ticket transactions.
- Designed relational database schemas for seat allocation, user verification, and automated booking receipt generation.

Saviour – Healthcare Mobile Interface

01/2024 - 05/2024

UNITAR International University

- Designed interactive, high-fidelity mobile prototypes in Figma for emergency SOS dispatch and real-time hospital tracking.
- Mapped user journey flows and wireframes applying Human-Computer Interaction (HCI) standards to streamline medical booking screens.

VOLUNTEERING & LEADERSHIP

UNITAR International University

08/2025 - 08/2025

Project Lead – AI Education Workshop

Petaling Jaya, Selangor

- Led an 10-member committee to organize and execute an Artificial Intelligence workshop for 200 Form 4 secondary students across 5 regional schools.
- Delivered interactive sessions covering AI fundamentals, practical generative AI applications, ethical considerations, and safety precautions.
- Facilitated interactive generative AI challenges and educational games to promote active learning and technology literacy among participants.

SKILLS

Languages: C++, CSS3, HTML5, Java, JavaScript (ES6+), PHP, Python, SQL

Frameworks & Libraries: DaisyUI, Express.js, Flask, Node.js, React.js, Tailwind CSS

Databases & Cloud Hosting: MySQL, Netlify, PostgreSQL, Railway, Render, SQLite, Supabase, Vercel

Developer Tools & Platforms: Figma, Git, GitHub, Microsoft Graph API, OpenStreetMap API, Postman, Power Apps, Power Automate, Power BI, RESTful APIs, Stripe API

System Design & Methodologies: Agile Scrum, Class, Database Normalization, ERD, PMBOK, Project Management, RBAC, Software QA & Testing, UML Diagrams
